

Paraguay Mission Trip Mason Tool List

1. The brick hammer is a specific type. It is different from a framing hammer.
2. The 2-foot level with the bubble in the middle fully exposed will make the job easier.
3. One 25-foot tape measure
4. One 10" trowel. (The Marshalltown is by far the best, but pricy)
5. Square-nose pliers and with long handles for tying rebar wire.
6. A padded tool belt is important for all day wear at work site.
7. One hammer holder for the brick hammer, which will attach to the tool belt.
8. One pair of wooden line blocks will be sufficient.
9. One 500-foot mason line roll per two masons will be sufficient. (Pink and yellow are best for visibility; however, some will still trip over the line!)
10. One scrub brush per family should be enough to clean tools at the end of the day.
